## Professional Summary

Results-driven **Software Engineer** with **2+ years of hands-on experience** as an **Individual Contributor (IC)** across product development and freelance projects. Proven ability to independently manage the **entire software lifecycle** including planning, domain mapping, full-stack development, deployment, and production support. Skilled in building **scalable, secure, and high-performance web applications** using **React.js, FastAPI, and PostgreSQL**, with strong expertise in **API architecture, system design, performance optimization, and debugging complex systems**.

## Technical Skills

**Languages:** JavaScript, Python

**Backend:** FastAPI, Flask, REST APIs

**Design:** Tailwind CSS, Sass

**Architecture:** API Design, Domain Modeling

**Frontend:** React.js, React Native, HTML5, CSS

**Database:** PostgreSQL, MongoDB, SQL

**Tools:** Git, GitHub, VS Code

**Deployment:** Cloudflare Pages, Fly.io, Neon

## Work Experience

### Software Engineer

*Famelyn – Hyderabad*

*June 2025 – May 2026*

#### Fliplyn – Multi-Platform Food Ordering & Wallet Ecosystem

- Designed and developed a **corporate cafeteria (B2B) platform** supporting employee meal benefits and caterer ordering systems.
- Built the **Fliplyn B2C kiosk ordering application**, a self-service food ordering system used inside corporate cafeterias for quick employee ordering.
- Developed **wallet infrastructure and payment systems** processing **10,000+ wallet transactions** and **10,000+ Cashfree payment transactions**.
- Implemented automated **daily, weekly, and monthly wallet crediting** using scheduled cron jobs.
- Developed **admin platform and role-based dashboards** to manage companies, caterers, users, orders, and financial transactions.
- Platform currently supports **500+ active users** across multiple organizations.
- Provide **ongoing production support** including monitoring live systems, resolving production issues, debugging payment failures, and ensuring platform stability.
- **Mentored and trained interns** on full-stack development (React.js + FastAPI), guiding them through real project tasks and best engineering practices.
- Conducted **technical interviews and candidate evaluations**, assessing problem-solving ability, coding skills, and system understanding for hiring decisions.
- **Tech:** React.js, FastAPI, PostgreSQL, Cashfree, Cron Jobs

#### LexFactos – Legal Services Marketplace

- Built a **full-stack legal services platform** connecting clients with verified lawyers across multiple cities.
- Implemented **multi-role system architecture** with dashboards for Clients, Lawyers, and Admins.
- Developed secure **authentication and account recovery** using JWT and OTP verification.
- Designed scalable backend APIs enabling efficient appointment booking and job posting workflows.

- **Tech:** React.js, FastAPI, PostgreSQL

### Freelance Full Stack Developer

*TechSilicon – Remote*

*Apr 2025 – Jun 2025*

- Delivered **SEO-optimized websites** for multiple companies including TechSilicon, AP LMEC Systems, and KautilSoft.
- Developed a **complete eCommerce platform** supporting vendor onboarding, product management, and customer ordering.
- Designed backend APIs using **FastAPI** and integrated with React frontend applications.
- Managed full production deployment using **Cloudflare Pages, Fly.io, and Neon PostgreSQL**.

### Backend Engineer Intern

*Bmdpe Technologies – Remote*

*Dec 2024 – Mar 2025*

- Developed backend APIs for vendor onboarding and food ordering workflows in the Grocify delivery platform.
- Performed API testing, debugging, and performance fixes improving backend stability.
- **Tech:** Python, Flask, MongoDB

### Frontend Engineering Intern

*TEK STRUCTURES – Chittoor*

*May 2024 – Oct 2024*

- Developed CRM application interfaces using **React.js** and integrated backend APIs with FastAPI.
- Built a mobile scheduling application using **React Native** with Expo Calendar integration.

## Education

---

### Bachelor of Computer Applications (BCA)

SDHR Degree and PG College, Sri Venkateswara University, Tirupati

*Sept 2023*

CGPA: 7.93

## Core Strengths

---

- Strong ownership and ability to independently deliver end-to-end software systems
- Expertise in debugging complex production issues and maintaining live production systems
- Provide continuous production monitoring and support for deployed applications
- Clear communication and effective collaboration across product and engineering teams
